		33	0.89

This survey was performed under my direct supervision using electronic distance measuring and geo-coded double theodolite surveying equipment. The undisturbed corners of the field corners and monuments were located and measured. The bearings and distances shown on this plan, adjusted for each closure. The bearings are based on magnetic North as determined at the date of the survey unless otherwise noted.

W. H. HANCOCK
 Registered Land Surveyor 18388
